

VISHAL DAGAR

Unity Developer | Gameplay Programmer

PROFESSIONAL SUMMARY

Unity gameplay programmer (C#) building core systems for **PC, console and mobile** games: building mechanics, NPC AI, customization, save/load and UI.

EXPERIENCE

Gallic Entertainment

05/2026 - Present

Unity Developer | Internship, Remote

Still House | *Core Systems*

- Built a modular **grid/free-placement building system** with snapping and rotation.
- Programmed a **NavMesh AI companion** that does chores and reacts to the room.
- Wrote a **JSON/binary save system** for room layouts and object states.

Radio Heart: Lofi Hours | *Gameplay*

- Built real-time **avatar and room customization** with persistence.
- Created NPC **behavior trees, state machines** and **Mecanim** animation.
- Built **event-driven UI** (Canvas/UI Toolkit) for menus, HUD and pickers.

Sort The Mart | *Gameplay, Unity 6*

- Built first-person **pickup, carry-stack and shelving** mechanics for sorting goods.
- Designed a **coin economy and upgrade tree** with timed powers like remote grab.
- Added **input rebinding**, a **URP colour filter** and **PlayMode tests** for core systems.

Fiverr

01/2026 - 05/2026

Game Programmer | Freelance, Remote

- Built **controllers, combat, Cinemachine cameras** and inventories for 2D/3D clients.
- Delivered **playable prototypes** from GDDs on tight deadlines.
- Fixed **memory leaks** and cut **draw calls** to improve framerate.

Iotabang

07/2025 - 12/2025

Associate Unity Developer | Part-time, Remote

- Designed levels for **Kwazy Cupcakes** (match-3, **300k+ downloads, 4.6 rating**).
- Shipped regular **updates and bug fixes** with the core team.

PERSONAL PROJECTS

- Endless Runner** inspired by Temple Run.
- Physics-based** rocket propulsion game.
- FPS** with NavMesh enemy AI.
- 2D platformer** with multiple levels and enemy types.
